

The image displays a technical drawing of a U-profile. The top part is a 3D perspective view showing the profile's depth and the central channel. The bottom part is a cross-sectional view, which is a 2D line drawing showing the internal shape of the profile. A vertical dashed line indicates the center of the profile. The cross-section shows a central rectangular cavity with rounded corners and a small circular feature in the center, likely representing a hole or a specific manufacturing detail.

≥600 mm: +20/+50
