

Item description/product images

Description

Material:

Steel.

Version:

Case-hardened, black oxidised and ground.

Note:

These supports are placed under long or thin workpieces to prevent vibration or bending during milling, drilling, grinding or shaping operations. The support can be accurately placed without the need to reach under the workpiece. The support pin contacts the workpiece under light pressure. It can be tightened in any position. Various types of pins can be screwed into the tapped hole in the thrust pin to adapt the support height.

The supports 02380-075, 02380-150 and 02380-170 have only 1 slot.
