

Item description/product images

Description

Material:

Elastomer spider polyurethane Shore 98A.
Coupling housing and clamping hub, aluminium.
Expanding mandrel steel.
Screws steel.
Centring rings 1.4301 stainless steel.

Version:

Coupling housing black anodised.

Note:

The motor adapter set with elastomer dog coupling system (elastomer coupling with expanding mandrel) provides a simple and cost-effective solution for connecting electric motors.

Advantages of the elastomer dog coupling:

- Hub with expanding mandrel can be mounted axially
- Play-free with vibration absorption
- Excellent retaining force
- Excellent concentric accuracy
- Short design
- Easy to assemble
- Can be mounted axially on spigot side
- Electrical insulation
- Nominal torque up to 30 Nm

On request:

Larger hub bore D.
Higher nominal torque.

Drawings

Overview of items

Order No.	Form	Size	C1	C2	D	Nominal torque Nm	Moment of inertia (10^{-3} kgm^2)	max. rpm	Tightening torque of screw C1 Nm	tightening torque of screw C2 Nm
