Repairs using
epoxy liquid metal

Description

Note:

Safety data sheets (see downloads) can be found officially and in various languages on the internet under the search term: 'Henkel Documents'.

General:

Twin syringe – Epoxy-liquid metal 97990-3450025

Two-component epoxy adhesive that after mixing quickly hardens at room temperature. The adhesive has a high strength on metal surfaces. The gap filling ability makes this adhesive ideal for use on rough and badly fitting faces made from metal, ceramic, thermoset or wood.

The twin syringes automatically guarantee the correct mix ratio.

Overview of items

Order No.	Container	Intern. Ident. No.	Product	Mixture ratio	Handling strength in min.	Temperature resistance
97990-3450025	25 ml	3450	twin syringe	1:1	15	-55 °C – +100 °C
