

## Item description/product images

## Description

**Material:**

Housing thermoplastic.

**Version:**

Operating principle: Magnetic.

Rating: IP67.

**Note:**

If the actuator is within the switching range (safety door closed), the safety contacts and, if applicable, the signal contacts of the safety switch are activated. The contact is thus closed via a magnet (magnetic field).

Form A: Actuator on one level to the safety switch.

Form B: Actuator offset by 90° to the safety switch.

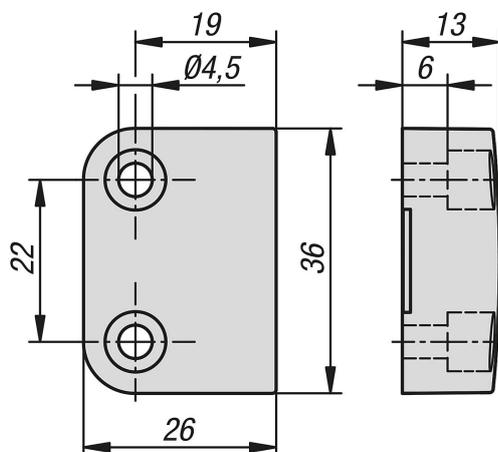

**Temperature range:**

-25 °C to +70 °C

**Accessory:**

Safety switch magnetically coded 83455.
