

## Description

## Material:

Body and rotary table Al alloy, anodised.
Spindle steel, case-hardened.
Spindle bearing maintenance-free.
Position indicator plastic.

## Version:

Radial play of rotation axis $<0.015 \mathrm{~mm}$.
Axial play of rotation axis $<0.02 \mathrm{~mm}$.
Repeat accuracy $<0.05^{\circ}$.
Spindle self-locking.

## Note:

$360^{\circ}$ adjustment, no end stop.
The position indicator reads in increments of $0.1^{\circ}$ increasing clockwise from $0.0^{\circ}$ to $9.9^{\circ}$ while the rotary table rotates counter-clockwise. A scale on the circumference of the rotary stage is marked every $10^{\circ}$.
The position indicator can be re-mounted in any of 4 positions by removing the grip and loosening the two screws.

Transmission ratio:
$21161-08=50: 1$
$21161-12=55: 1$

The rotary stage can be easily combined with other modules of the same size.

## Drawing reference:

Assembly position of position indicator:
a) top (standard)
b) right
c) bottom
d) left

All counterbores to DIN 74-Bm (D6)
