Description

Product description:

Swivel screws serve as a flexibly adjustable connecting elements to compensate for angles and spacings.

For example, as a foot element on machines or housings.

Material:

Threaded sleeve QT steel grade 10.9 or stainless steel 1.4305.

Ball element free-cutting steel or stainless steel 1.4305.

Version:

QT steel tempered and black oxidised

Free-cutting steel hardened and black oxidised.

Stainless steel bright.

Note:

Swivel screws may only be subjected to compressive loads.

The specified static load rating results from the material used for the ball element and is a static axial force.

Bending and buckling stresses occurring during application must be taken into account by the user.
