

Item description/product images

**Description****Material:**

GJL 300.

Version:

Support and mounting surfaces ground

Note:

Grid spacing 50 ± 0.02 mm.

Tooling blocks with grid holes are used for constructing modular fixtures. They can be positioned and mounted precisely on grid systems. This means that the grid hole spacing is maintained on the raised clamping face.

Tooling blocks can also be used as a base element for clamping smaller workpieces.

Size M12 tooling blocks are fastened using shoulder screws 07533-112065. Size

M16 tooling blocks are fastened using shoulder screws 07533-116065.

Please order protection plugs to plug unused grid holes separately.

Drawing reference:

- 1) grid hole
- 2) hole for shoulder screw
