

Item description/product images

**Description****Material:**

Carbon steel.

Version:

nickel-plated.

Note:

Locating bushes are placed in a fixture or interchangeable subplate and form the counterpart to the locating cylinder.

The locating bushes are centred in a reamed hole and then fastened with 4 screws. The balls of the locating cylinder engage in the groove in the locating bush, thereby forming a fast, secure and highly accurate changeover unit, and reducing setup and changeover times.
