

Item description/product images

Description

Material:

Roller rail profile: steel.

Roller: plastic PP.

Axle: steel.

Version:

Roller rail profile: galvanised.

Roller: grey similar to RAL 7042. ESD version black.

Axle: galvanised.

Note:

Durable and smooth-running roller rails. The system is fully assembled. The roller rail profile contains plastic rollers mounted on steel axles. Narrow centre distances guarantee smooth, trouble-free running. If required, the sheet steel roller rail profile can simply be cut to the desired length.

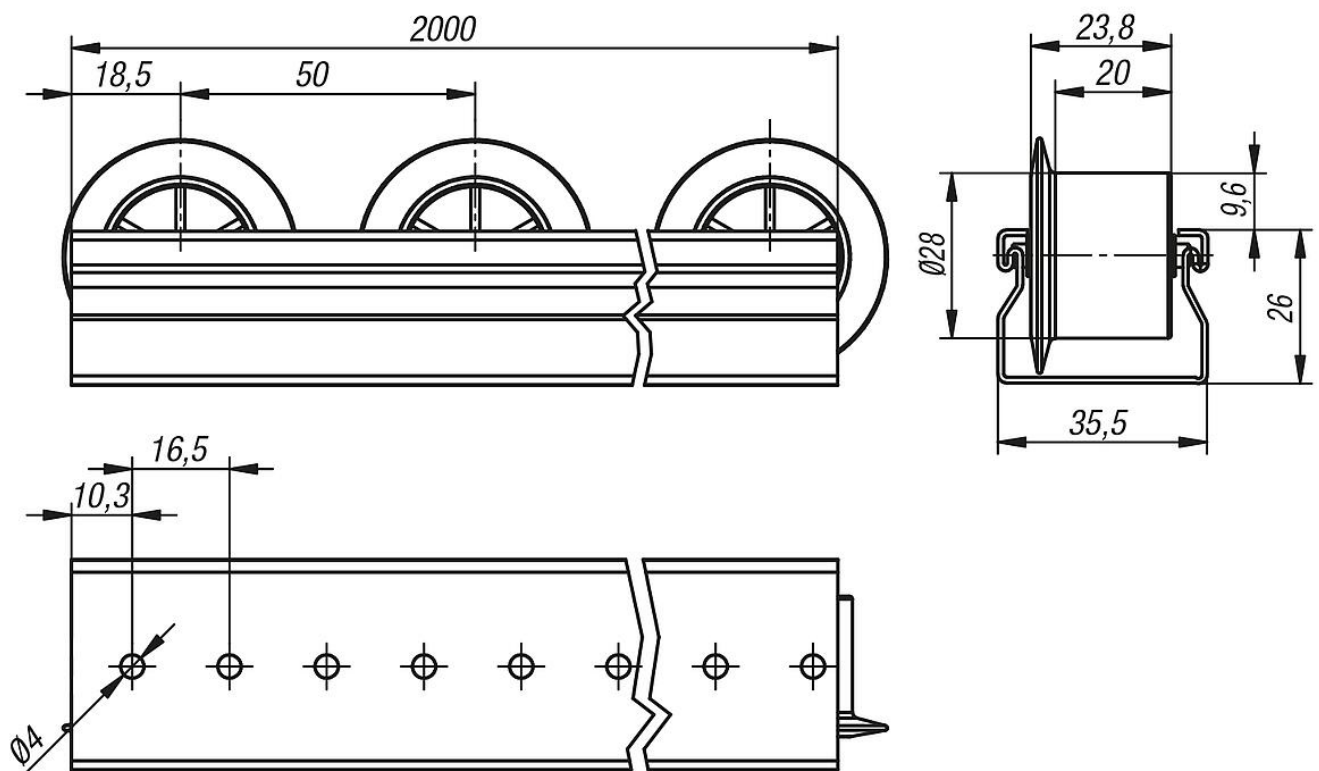

Fixed and variable brackets are available as accessories. This bracket enables direct connection to round tubes or profile tubes $\varnothing 30$ and to aluminium profiles with a grid dimension of 40 mm.

Form A: without wheel flange.

Form B: with wheel flange.
