

Item description/product images

**Description****Material:**

Carbon steel.

Version:

Forged, black electro zinc-plated.

Note:

We recommend the use of screw paste to reduce wear on the adjusting screw. The height of the power clamp can also be increased with the riser. A riser is not supplied with the 44 kN and 60 kN power clamps.

Supplied with clamping element, support element, DIN 508 slot key and grade 12.9 bolt.

Application:

The height of the clamping arm can be infinitely adjusted using the adjustment screw and the workpiece can then be clamped.

Advantages:

- Very high retaining forces of 30–49 kN.
- Low height.
- Simple element assembly.
- Enables very fast, simple clamping.
- Infinitely adjustable height and length.
- Use in 14-28 mm T-slots or M12, M16, M20 grid systems.
- Thrust pad available in smooth and serrated versions.

Accessory:

Riser 04630.

Thrust pad stainless steel 04631.

Thrust pad plastic 04631-01.
